

How else do you see technology being useful to you in school?	Which technology would you like to use in school? Why?
<p>You can research</p> <p>You can put the textbooks online to not make the students carry them around</p> <p>You can do so much more, and it's easier too so you dont have to take so much time finding stuff.</p> <p>You can do research for research papers.</p> <p>with research, project ect</p> <p>When we need to write reports.</p> <p>When the teachers are giving us notes, they use smartboards to project these notes and to project the announcements and other projects. It is easier to read the notes off of a smart board becuase they are bigger than looking at a computer screen</p> <p>When I have to write a paper or do a powerpoint for classes. well it can help with your school work and if you want to get things done fast because you can use like, vlookup or something else like that.</p> <p>We use it in computer class.</p> <p>We use computers in computer class every day we have class. I go on the internet almost every day.</p> <p>We use computers for computer class and in the library. Some of our homework, like essays, use the computer. Sometimes we have to research things on the internet or make powerpoints.</p> <p>We have laptops so we may do work on them if we have left over time in class.</p> <p>We have a smartboard and we always use it to write things on the board.</p> <p>we could use technology for activitys, crafts, homework, games, and more.</p> <p>We could use tablets for learning about new software and will be updated on our assignments as well as being updated with events around us.</p> <p>we could use laptops or ipads for notes</p>	<p>laptops</p> <p>i would like an ipad becauss that is what im using next year i would like to bring iPods (but people would say no to my opinon) because during the locker break sometimes the people below you take FOREVER!!! and you can also keep notes on the iPod, i text faster than i type or write, and it saves onto the notes app so you can't lose it. You can also keep time on your iPod.</p> <p>A laptop. I like to use laptops because I can move it around.</p> <p>computer so you can use reaserch and lookup stuff you dont no</p> <p>IPads, and IMacs like i have at home, and iPhones, and ITouches like i use at home also. i would like to be able to use my Kindle or Ipad as a place where i can store my school books bacause it would make it easier to handle instead of lugging around those really heavy books. I would also like to have WIFI, so i can purchase books on my kindle or ipad for classroom work or books to read, but with my on money. IF we had WIFI, the library could create a program to let students borrow books on their eReaders and Ipads.</p> <p>I would like to use my phone for school to look up information and make papers for classes.</p> <p>ipad, they are easier to work with than computers.</p> <p>Apple products- becuase schools around us use them and they are very succesful. I would like to use iPad textbooks because I am already used to using them at home. I would also like to be able to carry my phone around so that we can use them, but just not use them in class. Also, I want to be aloud to use a laptop during class. A laptop for each individual or ipad, because we dont have to use it with others and we will have our own work saved on there.</p> <p>I would like to use an ipad because I feel that i can use my technical skills in school more often. laptop, because then you can easily access folders, and we would not have to care around school and it could help use type faster.</p> <p>I would like to use laptops or ipads in school because it is easier to type down notes from what the teacher says and it is portable to bring to each class. laptops- take notes faster; improve my typing speed; keep all typed assignments together (not on different computers) iPad- for textbooks, novels: so I don't have to remember all my books for class, not as heavy, ebooks are cheaper</p>

We could learn out of the book and it is more interesting

We could all gert graphing calculators for math.

We can use it to view online textbooks.

we can use it for our research essays and to help us do homework and save it so we can keep track of it.

We can learn more about technology and make class more fun!

We can learn more about technology and make class easier and more fun!
we can learn a lot more than people could in the past and get a head start in typing so that it can help us in the future.

We can get ipods
we always have to do assignments using a computer and
we have to wait til we get home to do them :(when we
could just do them at school when we have free time :)

using technology in school you could go to vocabularyworkshop.com to practice vocabulary in reading and type your spelling words to practice spelling them.

Using technology at school is very useful. It helps us become more familiar with technology and makes want to use them more.

ummmm i dont really see technology being useful to me in school

To use the internet to search things

To teach about computers and the way they work.

to take tests online and diditally

to take notes.
To read without carrying around a bunch of books and using smartboards to present teachers lessons. Instead of always writing and writing copies, we can type and print. We can also have information being broadcasting in computer class.

To read on a kindle/nook device after you are done with assignments

To research information for essays and reports

I would like to have virtual textbooks to make my school life easier

Graphing calculators could help by having my own. I think that we should maybe use an iPad or some kind of tablet computer so that we can view textbooks and novels on them.

A Laptop. Because we would be able to use flashplayer, microsoft and other school-useful things. We would be able to save files for school and keep track of up coming things.

ipads because they can be beneficial to class

laptops, phones, tablets, ipod!

I would want to have ipads so that we dont have to carry a lot of books.

ipads and labtops

[illegible]

laptops and laptops because it is so much lighter and quicker to use during projects and not having to carry books around during school. Makes it more interactive and lets us become more hands on during school.

IPAD because they are really cool and they have games on them and they can also be really useful...

lpad because it is pretty much a computer but smaller

Personal laptops. This way we could have our own work in our own laptop.

iPads Because we could get all of our books electronically and save the trees.

I think labtops are useful because in the moder day everyone uses a computer to resarch write papers and ex.,

The use of ipads or android tablets would be good. It would also be good if the school could distribute laptops to the students for school use.

Kindle

Nook

ipad

itouch Ipohne

because we can stream the internet and read on all of these except nook and kindle (they are only used for

reading)
etc.

To learn classes

to help you organize your grades instead of getting papers

i would like to use computers

ipad because easiest to use not as long to take to turn on and off plus very light

To help us learn.

Tablets they help us learn.

I would like to use the I-Pad because it is portable and uses a lot less paper. You can also download apps to help you in school and prepare yourself more for even harder questions in the grades above. It is also easy to bring around so you do not have to carry two or more heavy books to class. I think I-Pads would help write notes faster and encourage people to study more in the enjoyment of using the I-Pad. The school might not have to pay for it because many people have I-Pads at home so the school can let them bring their own. The same concept can be used with Laptops or any portable computer or apple product. Thankyou for your time to consider this message.

to help find an answer to a homework question

Laptops, because computers are now becoming more apart of everyday life and we need to be more exposed to them.

To help children become advance in this world where technology is often used.

To explore more into the internet and to know more about the universe.

A phone because i am always on my phone and sometimes use it to help me with homework.

to do things on the internet

everything by apple

to do more powerpoint projects

ipad, they are easy to use and can do virtually anything you need.

to answer questions

ipads, cell phones and laptops

This way we would not need to bring heavy books home and will be more organized.

I would like to use laptops because typing is fast and easy. An iPhone so I can take my work everywhere. An iPad to have a bigger platform than an iPhone but smaller than a computer.

The smart boards are very cool and helpful when the lesson is on the smart board or we are watching a presentation of some kind. Some classes do not use technology at all, but most use at least the smart board. If the teachers made the smart boards a little bit more interactive like they were meant to be that would be interesting.

I would like to use more photo and video editing (Picnik, Movie Maker, etc.) and create more videos for projects.

The announcements.

Ipads because they are cool and have games on them. laptop. I would use a laptop because it would be easier to take notes. And look up things I would not know what they are.

That you don't have to write as many notes. The teachers will already have it prepared on the smart board.

texting
emailing
calling
web searching
ebay
facebook
instagram
apps
movies

movie maker i like making movies
WEB SITE MAKING

Text people about assignments to understand them better. Don't have to write as many notes. It will help the students be more excited about school because they can use technology.

Technology can be helpful when researching and doing homework.

Technology would be useful in school because it could save paper, help some people to take notes faster, and to become more in-sync with technology with other schools.

Technology is useful when trying to communicate with teachers or when doing projects and completing assignments.

Technology is useful to me in school for quickly being able to looking something up.

Technology is useful to me in school because you can take notes on this if you have a laptop and it helps to keep things organized.

Technology is useful to me because i can type faster and get more information from the internet.

technology is useful in this school beacause it really makes a difference for all the generations beacause we have lived with it for a long time now. We need it to do work

Technology is useful in school to research for projects and using a calculator in math sometimes if I don't know the answer.

Technology is useful for research, learning new things on websites that you have never known before. Connect with classes clearly.

Technology in the classroom can be helpful becuase it allows us to research information and make projects and papers using microsoft word and powepoint.

Technology in our school is very useful because by the time we get to high school we are going to have to be able run all of the softwares and have a acceptable typing score.

Technology has been our main resource for everyday tasks in life. It is important to have knowlede and at St. Rita we are fully prepared.

Technology could be very useful to the students in our school. There are many reasons to use it. Some reasons being that students would learn more about technology. Also we could make harder tasks easier than they already are.

technology could be usfull in my school with calculators computers smart boards. if we could get i pad that would be helpfull.

Technology could be helpful by teaching students ways to find information easier and solve problems quicker.

Technology could be a very useful thing for school in many classes. We could use them for research and to look things up. It would also save trees.

My Kindle Fire to read.

iPad, because we could hve all our textbooks on it and we wouldn't need to carry all our books with us. Also the students would like to learn on the iPads than on a textbook.

In school I would like to use lpads or laptops in school so you could take notes and do research during school.

Also, I would like to carry your cell phone or smartphone to have it in case of emergency or when you need to send parents a text or call them when you have the time.

I would like to use ipads at school. I think they would be very useful.

I would like to be able to use ipads because it has fun games and I can download my textbooks on it.

I would like to see our school using laptops because it will really help each student.

I would like to have iPads that stay in school beacause they can afford less than all the textbooks or we can have Kindles that stay in class.

apple because it seems to be the most advanced and best to suit all of the students to really push to new technology hights

I would like to use a blogging cite! Blogging rocks!

A phone: Phone- used for quick look-up or internet access on the spot. Dictionary, or messaging what class is next, assignments, and pictures to other students.

I would like to use blogging sites or more robotics

Normal desktop computers are fine with me, they have all the proper tools to teach me how to operate a desktop. I don't need anything too fancy, we just need to make sure to bring the computers up to date.

In school i like using the video cameras to make fun and educational videos.

I personally would like to use I-Pads or lap tops.

However, I-Pads would be more useful because they have internet and are portable while lap tops are heavier and bigger. I-Pads would be helpful because the librarians could download AR testing into the I-Pads. Instead of waiting to take AR tests students could take them whenever they want.

i pad would be fun because it would be like a miny computer and we could take notes and go on the internet it would be fantastic and great all the kids would love it young and old. it would be good and helfull!!!

I would like to use a laptop so I could take notes or start projects during school.

I think we should use an ipad. Becasue lpads have internet acsess whatever we save on the lpad could go on school web lockers. It would also be useful for book apps.

technology can be useful to researching important subjects during school or making it easier to send homework to yourself at home.

Technology can be useful because it enables me to go on the internet and research. Also, having access to computers in the library and classrooms is very helpful because I can search topics if I need. Also being allowed to have a nook in class is very helpful because I am able to read books that I was reading at home.

Some type of tablet for the upper school to use with e-textbooks, in math class, researching papers, and easily demonstrating ideas and work with others.

Smartboards, projectors,

Smartboards, projectors

Smart boards

smart board

Schools could be more intertwined if they were all connected onto one network using laptops or iPads of some sort

researching info.

Research, make learning easier by the many programs on technology

RESEARCH

reading, and helping with projects

on the announcements every morning.

Morning Announcements,

Many people would be more interested when learning from an electrical device than using an old textbook.

Make things like daily assignments easier on teachers and students by allowing us to use IPADS, Tablets, or Laptops to type assignments so they are easily read and turned and not lost or thrown away.

Use IPADS, Tablets, or Laptops to be more Eco friendly and not print things...but send them out through the snyc thingy we use in computer class and have use do them on there and send them back to our teacher(s) when we finish.

Eliminate the need for Lockers by having almost all books digital and make it so a teacher can stop someone from working while they are talking by locking the IPADS, Laptops, or Tablets through the snyc thingy. :D

And again so you dont risk losing it in a backpack or binder or locker

The ipad is very versitile and can do many tasks.

I would like to have laptops for the seventh and eighth graders because it will enable us to take notes in class quicker, and we would be able to search right in front of us the topics we need to search. Also it would allow us to become better at using computers and our typing skills would increase.

Tablet computers - as described above

ipods - music helps me focus, maybe only as an eight grade privilege

Ereaders or tablets so students do not have to carry all of our textbooks around

IPad

ipad

I like laptops just because they are a better tablet or iPad... You could buy an iPad for 500 or more dollars or you could buy a laptop which is faster and more capable to do tasks with school...

ipads, this is because we can get apps for all our textbooks and we would not have to cary a bunch of books around. The ipad is very light weight.

Laptop because it makes writing essays easier and we will always be prepared to start early and in free time. Helps us get internet access for information

COMPUTERS BECAUSE IT IS EASY TO USE FOR RESEARCH

everywhere. because theres almost always a time were technology would be helpful

It would be helpful to be able to bring music to class while taking tests or for after tests.

Laptops because we can type a lot of things instead of writing them and we can start assignments we need to do on the computer without waiting to go home.

I would like for schools to use Ipads because the device has been used in different schools in the U.S. and has brought decent results in educating students.

Tablets for every middle school student- to make it easier to turn things in and not lose stuff...allow teachers to have more control over a class room and become more tech savy school and so when someone is sick they can keep up with the rest of the class or when we have inclement weather

Laptops for every middle school student - so we can get more done in class and give teachers more control over classes and make it easier to turn things in and not lose stuff and increase typing speeds and become a more tech savy school and so when someone is sick they can keep up with the rest of the class or when we have inclement weather

Ipads for every middle school student-to make it easier to turn things in and not lose stuff...allow teachers to have more control over a class room and become a more tech

Make things like daily assignments easier on teachers and students by allowing us to use IPADS ,Tablets, or Laptops to type assignments so they are easily read and turned and not lost or thrown away.

Use IPADS, Tablets, or Laptops to be more Eco friendly and not print things...but send them out through the snyc thingy we use in computer class and have use do them on there and send them back to our teacher(s) when we finish.

Eliminate the need for Lockers by having almost all books digital and make it so a teacher can stop someone from working while they are talking by locking the IPADS, Laptops, or Tablets through the snyc thingy. :D

And again so you dont risk losing it in a backpack or binder or locker

Looking up assignments, contacting parents

Look at homework

Learning facts that may be important in the future

Id relly like to be able to have my phone with me all the time durring school.

its usually not useful but it would be useful on ipads!!!

It would be nice to have WIFI if we get laptops for 7th and 8th graders.

It will not only help us get our work done faster in class faster, but will also help to develop our skill in that specific program we are working in. It also can be used to help others who may be slower than you in class.

It will not only help us get our work done faster in class faster, but will also help to develop our skill in that specific program we are working in. It also can be used to help others who may be slower than you in class. It will help make taking notes faster, more efficaint, and neater.

We will also be able to begin assignments in class.

It teaches us how to use the technology we need in our daily lives.

it is very resouceful

save school and so when someone is sick they can keep up with the rest of the class or when we have inclement weather

Tablets for every middle school student- to make it easier to turn things in and not lose stuff...allow teachers to have more control over a class room and become more tech savy school and so when someone is sick they can keep up with the rest of the class or when we have inclement weather

Laptops for every middle school student - so we can get more done in class and give teachers more control over classes and make it easier to turn things in aand not lose stuff and increase typing speeds and become a more tech savy school and so when someone is sick they can keep up with the rest of the class or when we have inclement weather

Ipads for every middle school student-to make it easier to turn things in and not lose stuff...allow teachers to have more control over a class room and become a more tech savy school and so when someone is sick they can keep up with the rest of the class or when we have inclement weather

phone- contacting and enternet

computer- email enternet

kindle/nook-reading

I would like to use Excell because I like to make graphs and surverys on the computer.

MY phone, because its an i phone so it can do many things that can help me wtiw my homewrok for example the claculator, dictionary,internet and other apps.

ipads because we could have the same things and it would be portable

Laptops! IPads! Calculators! Ability to bring iPods to school and not get in trouble, but with it turned off???

Laptops! IPads! Calculators! Ability to bring iPods to school and not get in trouble, but with it turned off???

Becasue they have programs on them that you can use to help you function- like an iphone has a calculator, internet service, dictionaries, YouTube for science and understanding things. :)

I would like to use a laptop, and prehaps an IPod, maybe even an E-Reader

I like to use the computers in computer class at school

i would like to have my iPhone

[illegible]

ipads

In School, it is very helpful to use computers for class projects and papers. I probably use Microsoft every day for class homework.

In school, I usually use technology for research and Computer class.

In school I think we could do more with technology by using photo and video more often.

In learning more

In learning more

In collage you use computer and laptops. I will help you learn about many useful stuff. this world is moving so fast in technology many people will be overwhelmed with info when they get to collage.

If you need help for possibly a problem, test, quiz, or homework.

if we get iPads, it would make things a lot easier.

If we ever get ipads at this school, this would lighten the load of our backpacks. Jesuit uses the ipad. if we all had our own computer then we wouldn't have to take turns on the 3 computers in the back (not in computer) and essays research papers and power points

I would be able to do better in grades because i am more used to technology than books.

I use word to type reports, projects, or scripts. I search the Internet to find information for my reports, projects, or scripts.

I use technology in school to help me understand the lesson we learned that day. Sometimes I find websites that might have learning games which can help me learn. Another thing that is useful to me in school is making study guides for test that are coming up.

I use it to take notes, watch educational movies, use Microsoft Office, etc.

I use it to take AR tests and i also use it for the library

I use it for projects and paper

I use computers at computer class and use computers for typing essays and reports and powerpoints

i think we could use apps to help us learn. I think we could carry a laptop or something around. instead of buying spirals we could take all of our notes on the computer. It would be easier. Our teachers could also just post notes somewhere and we could download it. It

Ipad, you can put online books on them Once i go to Ursuline, i will be able to use computers with a touch screen. I feel that this type of technology should be used in middleschools. In Conclusion, i would like to bring a laptop with me everywhere i go in school.

I don't think this could happen but i would LOVE it if we could use Digital Game Maker by YoYo Games. I think that ipads are useful and many kids know how to use them and I think that some of the software should be made so it works with Macs and Dells

Laptops- it would be easier to carry and there would not be oh i forgot my spiril at home

Ipad- there are many useful apps may people would find laptop more useful than book and paper that just get lost

I would like to have a laptop because if we need to type we can just take out our laptops and not have to go to another classroom.

Our own computers, or iPads would help our school so we could take notes quicker in class without our fingers and hands cramping from writing so much.

I would like to use the ipad because i would not have to carry around all of my books. I could get the textbooks on the ipad. It would be a fun way of learning.

ipod iphone ipad laptop because then we could work on things in school and at home

I would like to a kindle, ipad or iphone or itouch

Computer or laptops. Laptops are easy to carry and are not too heavy.

I would like to use laptops. Many highschools have their students use laptops because it is easier for note taking and a more fun and exciting way to learn. Carrying a laptop can also help keep more organized.

I would love to use laptops, iPads, e readers, and any other useful technology. This would help us be more organized and more accessible to new ways of learning.

ipads because we can carry them around and have them when we need them

computers because they are very helpful for research

If we had ipads instead of textbooks so we wouldn't have to pay for all of the books or carry them around

ipad

I think we should all get macs for the computer lab. I think everybody should carry around macbooks. They are lightweight and very advanced. They are also easier to type on than ipads.

would save time for class.

I think the technology in the school is important because it could help us get ahead on homework, find information and learn how to type

I think that using technology is very useful because you can find a lot of info on stuff you need like a research paper or something like that. Also like typing games and free educational games is good.

I think that students should be able to use technology everyday while at school. It is helpful to students because they are growing up in a technology filled world.

I think that it could be a way to teach the younger kids how to use technology in the developing world.

I think technology could help make learning easier in our classes. I think it can help us focus better. It also would be conserving paper. I do not think we would be as distracted if we used technology since we would have the lesson right in front of us. It would make our research easier and writing papers not as difficult and less of a 'home activity.'

I think technology could also be useful in school by researching stuff for school like instead of books we could maybe just also have the computer to understand it a little bit more.

I think it would be useful because you could get an app that might be very useful to your class or project. It can also get us ready for the real world with upcoming technology and jobs that might require you to use them.

I think it is useful for everything so it can't be any useful

I think it is fun to play video games and explore the world at your finger tips

I think being able to go on the internet during school to do a specific assignment.

I see us using technology in school because it will encourage us to want to learn.

I see that technology can be useful to people in school because it makes school fun if you have fun things to do it with. I can see us bringing in iPads because they are an easier tablet than a computer.

I see technology being useful because kids in this generation are growing up on technology. It will help each student learn at their own pace and at their own learning ability.

I see technology useful for subjects like math and english. Math is the class that you use graphing calculators daily for. In english class, we type essays almost all the time.

I see technology to be useful in our school for other extra videos or projects that have to do with exposure to cameras and editing certain videos or music too. We should have the ability to have wifi and to connect to certain websites that we aren't allowed to now. We should have a more free ability to look and share certain things that aren't already blocked.

I would like to use laptops that we can carry around in school to help us with our education and help us with homework, information, etc.

A laptop because you should be able to use a computer in school because if you don't know something you can look it up or you can email your teacher something you missed.

iPad

Laptops

iPhones

Internet, typing games and having all internet access to teach the kids to be internet safe and letting them get the feel of having unlimited access.

I would like to use a Laptop (Mac) to make research and writing essays and papers easier and taking notes easier.

I would also like to use an iPad. It would make classes easier to focus on and it would be easy to carry around. It would make classes more interesting and fun also. I think it would be a good idea to use technology in school.

I would like to use my phone or ipod because in breaks we could just listen to music and text and we wouldn't have to use them in class but just have them.

ipad!!!!

iPads, their fun

LARRY'S BIRDS

I like to you any thing from a phones to ipods to all mac products

It would be helpful to have an iPad or a laptop with you during class.

I would like to use laptops because we can research things in class. I think we should also be able to use e-readers without having form.

I would like to use apple products like an iPhone or iPad. They help us search the web easier. The iPad is easier than a computer because they are hand held and can be carried around.

I think we should be able to use iPads for research.

I would like to use my x-box, ipod, iPad, laptop, and my high level laser.

We should be able to use apple products in our school. Being able to use Mac laptops for the upgrades. or getting better quality computers.

i see technology being useful in school when i can use calculators and i learn new things i my computer classes
I see technology being useful when students need to do research on a subject to help them study for tests or prepare for papers.

i see technology being useful to me in school when i need to print a paper for school in the morning, using a calculator in math class and overhead projectors and smartboards for each class.

i see technology being useful to me in school when i get to highschool cause i feel it will make things more fun and interesting to learn scholastically with an ipad rather then a paper and pencil.

I see technology being useful in school because of smart boards. Also calculators for math, computers.
I see technology being useful in school because it saves paper and makes researchings topics and typing assignments easier.

I see technology being useful in my school by taking a computer course since kindergarten. I use technology in school when I use calculators.

I see technology being useful by informing the students and teachers of new things throughout the internet and other resources. Technology is very vibrant in our economy and every person should be up to date on technology, especially in schools. Schools should have extremely productive technology since students and teachers use their technology every single day.
I see technology being useful because it helps us write papers look up information on the internet and search the net for fun.

I see technology as a way to get typing or emailing homework done.

I see it to be more quick to do assignments for certain subjects for essays instead of writting everything out with your hand.

i see it can be useful in school because it teaches people new things about the computer

i see it bing hellp ful when i need to type my home work

I see it being useful in homework.

i see it being used as computers, teachers texting on pones, smartboards, and printers

I see computers being useful for researching information...we rarely use books to site a wide varitey of information because computers are much easier. We only use reference books at school. Computers make up most of the research for school

I research information about topics i dont know or understand and i write essays and type stories for school assignments.

i would like to use tablets such as ipads, nooks, or and other ereaders and my phone

I would like to use a tablet that contains all of our school books so we wouldn't have to carry as many of them.

i would like to use iPads so that we could go on the internet and not have to wait for a computer that is just in one specific place; it could be portable.

i would like to use an ipad because it seems like a huge advancement in technology
Phone. I would choose my cell phone because it has a calulator and if i needed the deffinition of something i could look it up on my phone.

Mac Laptops

I think that it would be useful if all the students had their own laptops/net books/tablets so that they don't have to deal with other students messing with their personal information, which has happened to many students before. I would NOT want my text books online because I prefer hard-copy books instead of e-readers. I believe if the school does get e-readers, that traditional text books be offered as well.

Computers are very important because students should learn how to use a computer because in the real world computers are very resourceful.

I would like to use an ipad because i am using it next year.

Laptops because I usually type on those at home

I would like to use no other technology except the computers that we already have.

videoe cameras

computer because it hellps me

I would like to use more advnaced technology in general. Softwares and networking, or maybe tablets. Not just computers and smartboards.

ipads because we could download all our books onto the ipad and ipod and iphones so we could play them during free times only when we are allowed

I would like to use an iPad in school because they are portable and easy to access. Laptops are often too heavy, but would be better than nothing.
IPad, because you can do almost everything in school with it including getting text books on it and accessing the internet from the classroom.

i pads instead of textbooks

i look up stuff for homework :)

I look for sources for my information or essays that i have to write.

I learn about things that i didn't

I hardly see it useful but we use it to research for classes sometimes

I google stuff.

I find technology being useful when you have to write essays, jot down information, and I find it useful for when you have to sometimes contact one of your friends or family members.

I Enjoy using technology in school because it helps academically. It will help efficiently in everyday life. As we progress through our years, i intend on using technology to help me in things such as taxes and School Papers.

I Dont know

I could type essays at school.

I can use it to find information.

i can see technology being useful to me in school when I use the Smart Boards and computers. They tech us easier ways to do things.

I can see technology being useful because the students will actually be excited to learn with new technology. They will learn computer skills for when they have a business. Instead of carrying around huge, heavy books you can download the books and read them on the an e-reader.

I can be more exposed to learning new and fun ways to be on a computer.

I also see technology being useful in school for typig because my handwriting is sloppy.

Helps me to know where to go and to stay organized; also to check my grades.

Help us to do assignments, gather information, get pictures for projects or homework, make our curiosity lessen and be cured.

Having an ereader to read in spare time

In the classrooms to keep track of assignments and homework

ipad
everything

[illegible]

Ipad becasue i think they are easier because i have an apple device so i know how to work them

apple products very usefull!!!!!!!!!!!!!! very usefull!!! :) :)
I would like to see ipads used so it could be portable and
it could have all of our information and it would be a big
step in technology at our school and create an ever
better learning enviorment

l pads because they are really cool and not slow.

I would like to use a type of technology that allows you to use the Internet to play games, write research, or to just watch funny videos, or to also look stuff up.

I would enjoy being able to use cell phones in school for educational puposes. If we turn of of cell data and use a wifi that the school can create, i think that many students would be more content with this school. I would not be angered in any way if I had to sign a contract stating the rules. Students could Type faster then they write, and use the internet at eny time.

ipods to listen to music

I would like to use computers. They are more powerful than tablets and are more connected.

iPad because I feel like we need to be exposed to new technology.

I like what we use right now, but the use of a Tablet or an iPad would improve our time by a lot because we wouldn't have to boot up a computer at all times. The internet would be at our fingertips. Though there are problems with the fact that kids may play games, overall it would be a great upgrade.

Laptops would be easy because it would be faster to take notes and they are very portable. It makes everything easier because you don't lose your notes or tests if they slip out of your binder. They are saved in your computer.

I would like to use laptops, phones, tablets, ipods.

I would like to use laptops because It will make me more organized and I could type things instead of writing it.

ipads

Computers and occasionally tablets to read off of.

Giving us our homework if we didn't write it down
For Textbook so that we will not have to lug books around and to highlight as well as write in the books

For taking notes instead of wasting paper

For taking notes if we had a laptop

For school I use technology to make powerpoints, write papers, and too look up information.

For papers

For homework, reports, etc.

for homework

for everything school.

for everything

for educational games, and powerpoints
everybody having a computer or ipad would let everyone being able to type and research at the same time. we only have at the most 4 computers to a room and about 25 kids. Most kids will call the computers and not everyone will get to use it. personal laptops or ipads would diminish that and everyone would have something to save on. Everyone would only use one computer and their wouldn't be any problems with computer use.

Essays, research papers, power points
entertainment during free time.
it can give teachers a large source of knowledge
typing is easier than writing

emailing teachers getting notes when im absent renweb
Emailing teachers when i missed an assignment
teachers show everyone in class the same thing like
smart board tech
putting textbooks on a tablet
personal laptops for upper middle school

emailing my teachers for notes when i am absent, using renweb
Emailing information to and from teachers
Library catalog
Ar tests
teaching us about word processors
SMART BOARDS

easier to organize things and take notes

computers

ereaders so we can bring that instead of an actual book
Tablets for Textbooks and ereaders for in school reading and summer reading

An iPad because you have access to many apps. Plus, it could help with other stuff!

ipads or macbooks because they are fun
I think we should have laptops for school so we don't have to carry around heavy books. We can just download our books to our laptops.

Iphones and Ipods so we can play games

I would prefer to use different video editing softwares as well as audio recording devices.

cellphones

ipads, cause there helpful

ipad no matter what!!

i would like to use ipads because you can go to the internet, play educational games, and write on it

Laptops because they have word and flash player. They are easy to type on and everyone knows how to use them.

laptops

I am happy with what we have now because I know a lot about it.

Ipads
ereaders
mac laptops
ipods

laptops because it is easier to type notes than to write them!

iPads

iPad and laptops because it would be easier to organize papers and take notes

A IPHONE because when we are in the hallways instead of walking to them you just pick up your IPHONE and text

computer and many other subjects
clocks count as technology
we also use green screens and cameras for
announcements

by typing essays for school and looking up something
that you might need to buy for school

by giving us information
because if i do not fully understand what the teacher is
talking about or i have not written down a definition then
i can look it up and find the answer. or in math i can look
up how to do a problem and to help me understand more

Almost all teachers use the smart board

all of the above

A way to find the answers to all of your problems.

I can tell my mom when i am ready to go or i can use it
for calculators when we can use one in math they are
very helpful resources.

We would all like to be able to use calculators in math
class. We would like to be able to use more computer
sources on projects.

or call them

anything i want to learn new stuff every day like what I do
in this school

ipads, they are almost the same as lap tops or regular
computers
i would love to use ipads because you could carry them
around and put all your homework on there and email to
the teachers. its also good because you can go on the
internet, your email, and everything else. we could even
get an app thats a game where sometimes the whole
class plays on there ipad and sees who wins instead of
doing it on the smart board. also in math during do nows
you could do on there and send it to the teachers. i think
ipads would be perfect for school.
macbook air because they are cool and light and helpful
to us in researching and get new computers because
these are slow and we should get macs and hot tubs

PHONE or itouch!!!! because my phone has everything i
would need to find information on about it, and it has
internet service of its own so i can use it(:

ipads, or laptops because it would be easier to take notes
and you can not rip a page out of your notebook.

ipad

The iPad, because it's a computer and more than that
which you can carry around.
I think we should be able to use ipod touches or iPhones
cause they are the fastest and smartest but we wouldn't
be aloud to text on them cause the texting apps would be
off.

I would like to be able to use ipads and laptops at
school.
